Q. Create a user persona for the audience that is engaging the most with the Google Merchandise Store. To create the user persona, assess the most engaging demographics such as age, gender, etc., from the 'Demographics' report. Also, build on the interests of the user persona by deriving details from the 'Interest' report.

User Persona: Alex Johnson

Demographic Details:

Age Group: 18-24 years old

Gender: Male

Location: New York Mountain View, Sunnyvale, San Jose, San Francisco, Toronto,
Chicago

Language: English

Interests and Behavior:

1. Primary Interest:

- Technology/Technophiles
- High engagement rate (66.27%)
- Average session duration: 1m 48s

2. Secondary Interests:

- Banking & Finance/Avid Investors
 - Travel/Travel Buffs
- News & Politics/Avid News Readers/Avid Business News Readers

- Lifestyles & Hobbies/Shutterbugs
- Shoppers/Shopping Enthusiasts**

Summary:

Alex Johnson is a young, tech-savvy male primarily located in New York, who speaks English. He has a strong interest in technology and follows the latest trends in the tech world. Additionally, Alex is interested in finance, travel, and current events, and enjoys hobbies like photography. He is also an avid online shopper. Alex typically engages deeply with content, spending close to two minutes per session, and he visits multiple pages during each session.

This user persona can help tailor marketing strategies and content to better suit the interests and behaviors of the most engaged audience segment of the Google Merchandise Store.

Q. How many users are using Chrome, Firefox and Safari respectively?

- Chrome user- 46,790
- FireFox user- 597
- Safari user- 8,514

The screenshot shows a web analytics dashboard with a sidebar on the left containing navigation options: Reports snapshot, Real-time, Life cycle (Acquisition, Engagement, Monetisation, Retention), Search Console, User (User attributes, Overview, Demographic details, Audiences, Tech), and Tech (Overview, Tech details). The main content area is titled 'Tech details: Browser' and displays a table of browser usage data for the last 28 days (19 May - 15 Jun 2024). The table has columns for Browser, Users, New users, Engaged sessions, Engagement rate, Engaged sessions per user, Average engagement time, and Event count. The data is sorted by Users in descending order.

10 UC Browser	69	70	11	15.71%	0.16	3s	

- What are the bounce rates of each of these three browsers?

Bounce rate of Safari is
60.26%

Bounce rate of Chrome is
38.61%

Bounce rate of Firefox is
56.02%

Q. What is the revenue generated from each of them?

- Chrome Revenue Generated- \$166,502.14
- Safari revenue Generated- \$4,346.76
- Firefox Revenue Generated- \$211.92

The screenshot shows the Google Analytics 'Tech details: Browser' report for the last 28 days (19 May - 15 Jun 2024). The report lists various browsers and their associated revenue. The 'Total revenue' column shows the revenue generated by each browser.

Browser		Engagement rate	Engaged sessions per user	Average engagement time	Event count All events	Key events All events	Total revenue

G] Optimisations

- Among the top 10 landing pages according to sessions, which ones content should the GMS optimise ?(Hint: The highest bounce rates indicate that the number of people moving away is the highest for these pages as compared with the others, andhence, their content can be optimised to make them more engaging/relevant.)

The screenshot shows a data analytics interface with three main panels: Variables, Settings, and a Free-form table.

Variables Panel:

- TECHNIQUE:** Free-form
- VISUALISATION:** Table icon selected
- DIMENSIONS:**
 - Event name
 - Gender
 - Country
 - Landing page + query string
 - Device category
 - Town/City
 - First user medium

Settings Panel:

- SEGMENT COMPARISONS:** + Drop or select segment
- ROWS:**
 - Landing page + query string
 - + Drop or select dimension
- START ROW:** 1

Free-form 1 Table:

		desktop		mobile		tablet
Landing page + query string		Active users	Bounce rate	Active users	Bounce rate	Active users
Totals		31,553 52.81% of total	34.13% Avg -28.47%	19,848 33.22% of total	55.76% Avg +16.87%	8,500 14.3% of total
1	/	17,888	25.51%	14,676	65.14%	8,500
2	(not set)	24,686	99.34%	6,939	99.83%	1,200
3	/shop/family-day?autologin=true	8,390	14.16%	409	24.84%	
4		918	99.17%	308	99.77%	
5	/canada	610	51%	290	53.27%	
6	/shop/apparel	436	22.92%	407	32.99%	
7	/shop/apparel/mens	496	47.17%	229	50%	
8	/shop/lifestyle/bags	248	25.44%	345	29.02%	
9	/shop/shop-by-brand/youtube	262	31.14%	240	32.73%	
10	/shop/family-day	437	37.5%	33	54.35%	

Among these, the pages with the highest bounce rates on both desktop and mobile that should be optimized are:

(not set): This has the highest bounce rate, indicating a significant issue that might be causing users to leave immediately. It's essential to investigate what "not set" refers to, which might be a tracking issue, and resolve it to capture proper landing page data.

- Your brand has the option of either running an SEM campaign nor investing in Search Engine Optimisation. Based on the channels of acquisition, which ones should GMS focus on and why?

- GMS should focus on investing in Search Engine Optimization (SEO) over running a Search Engine Marketing (SEM) campaign. The organic search channel not only brings a higher volume of users but also shows better engagement metrics across the board. Users coming from organic search are more engaged, spend more time on the site, and generate more events per session, indicating higher interaction and potentially higher conversion rates.
- GMS is trying to get 'new' users to their website by using an email campaign. If they were to target a particular demographic, then which age group and gender should they focus on?(Hint: To understand which demographic to focus on, you can refer to the audience report to see where GMS is getting the maximum percentage of 'new' users from, as opposed to repeat users.)

1. Males (18-24)* have the highest number of new users (3,399).
2. Females (18-24)* also have a significant number of new users (2,351).

GMS should focus their email campaign on the 18-24 age group for both males and females. This demographic shows a high number of new users and likely represents a receptive audience segment for attracting more visitors to their website.

Thanks!

THANKS!
