

Search Engine OPTIMIZATION

Presented By janvi kalaskar

with help of chatgpt

1. What should be the major keyword groups that he should target?

To help Tushar effectively with SEO for his price-drop notification website, we need to identify major keyword groups that will attract his target audience and improve his search engine rankings. Here are the major keyword groups Tushar should target:

1. product Price Tracking Keywords:

These keywords focus directly on what his website offers, helping users find services that notify them about price drops.

- Price drop alerts
- Price tracking website
- Price drop notifications
- Price tracker
- Price alert service

2.E-commerce and Shopping Keywords:

These keywords target users who are actively shopping and looking for deals or price changes.

- Best deals online
- Shopping deals alerts
- Online shopping discounts

3. Retailer-Specific Keywords:

Targeting keywords that mention specific popular retailers can attract users who shop at these stores.

- Amazon price drop alert
- eBay price tracker
- Walmart price alerts

4. Product-Specific Keywords:

Focusing on specific product categories can attract users looking for deals on particular items.

- Electronics price tracker
- Fashion discount alerts
- Furniture price drop notifications

5. Competitor-Based Keywords:

Targeting keywords that relate to competitors can help attract users looking for alternative services.

- Honey price drop alerts alternative
- CamelCamelCamel price tracking
- PriceBlink vs. price drop alerts
- Best price tracker app like Keepa

2. What search engine he should optimise for

Tushar should primarily optimize his website for Google. Here are the reasons why and additional considerations for optimizing for other search engines:

Primary Focus: Google

Market Share: Google holds the largest market share among search engines globally, with over 90% of search queries conducted on Google. Optimizing for Google ensures reaching the widest audience.

Comprehensive Ecosystem: Google's ecosystem, including Google Search, Google Maps, Google Shopping, and YouTube, provides multiple channels for visibility and user engagement.

Advanced SEO Tools: Google offers powerful tools like Google Search Console, Google Analytics, and Google Keyword Planner that help with tracking, analyzing, and optimizing SEO performance.

Secondary Focus: Other Search Engines

While Google should be the primary focus, considering other search engines can help capture additional traffic:

- Bing:
- Yahoo:
- DuckDuckGo:
- Baidu (for Chinese Market):

Optimization Strategy:

Google Optimization:

Content Quality:

Create high-quality, relevant, and regularly updated content.

Mobile Optimization:

Ensure the website is mobile-friendly as Google uses mobile-first indexing.

Backlinks:

Build a strong backlink profile with authoritative websites linking to Tushar's site.

Technical SEO:

Ensure fast loading times, secure connections (HTTPS), and a clear site structure.

Bing Optimization:

Keywords:

Bing places more emphasis on exact match keywords.

Social Signals:

Bing considers social signals (likes, shares) from platforms like Facebook and Twitter more than Google does.

Multimedia Content:

Optimize multimedia content (images, videos) as Bing's algorithm places more emphasis on these elements.

By focusing on Google while also considering other search engines, Tushar can maximize his website's visibility and attract a broader audience.

3. What metric he should use to evaluate the performance of the agency

for effectively evaluate the performance of the SEO agency, Tushar should focus on a combination of key performance indicators (KPIs) that measure both the outcomes of the SEO efforts and the progress toward achieving his business goals. Here are the primary metrics to consider:

1. Organic Traffic:

Definition:

The number of visitors coming to the website through organic search results.

Why Important:

Indicates the success of SEO in driving traffic without paid ads.

How to Measure:

Use tools like Google Analytics to track changes in organic traffic over time.

Keyword Rankings:

Definition:

The positions of targeted keywords in search engine results pages (SERPs).

Why Important:

Higher rankings for relevant keywords increase visibility and traffic potential.

How to Measure:

Use SEO tools like Ahrefs, SEMrush, or Google Search Console to monitor keyword rankings.

Conversion Rate:

Definition:

The percentage of visitors who complete a desired action (e.g., signing up for price drop alerts).

Why Important:

Shows how effectively the traffic is being converted into leads or customers.

How to Measure:

Track conversions using Google Analytics or other analytics platforms.

- Bounce Rate:
- Backlinks:
- Page Load Time:
- CTR (Click-Through Rate)
- Average Session
Duration:
- Domain Authority (DA):
- Number of Indexed Pages:
- Return on Investment
(ROI):

Evaluating Performance:

Set Benchmarks and Goals:

Establish clear, measurable goals for each metric at the start of the campaign.

Regular Reporting:

Ensure the agency provides detailed monthly reports on these KPIs.

Comparative Analysis:

Compare performance over time to track progress and identify trends.

Adjust Strategies:

Use the data to make informed decisions and adjust SEO strategies as needed.

By focusing on these metrics, Tushar can effectively evaluate the performance of the SEO agency and ensure that the SEO efforts are aligned with his business objectives.

4. How should he define his content strategy

To define an effective content strategy for Tushar's price-drop notification website, he should follow a structured approach that aligns with his business goals, target audience, and SEO objectives.

1. Define Business Goals and Objectives:
2. Identify Target Audience:
3. Conduct Keyword Research:
4. Content Types and Formats:
5. Content Calendar:
6. SEO Optimization:
7. Promotion and Distribution:
8. Measure and Analyze Performance:
9. Continuous Improvement:

5. How many backlinks he should create if any?

The number of backlinks Tushar should aim to create is not a fixed number but rather depends on several factors, including the competitiveness of his niche, the quality of the backlinks, and the strategies of his competitors.

Quality Over Quantity:

High-Quality Backlinks:

Focus on acquiring backlinks from high-authority, relevant websites. A few backlinks from reputable sources are far more valuable than many from low-quality sites.

Aim for backlinks from sources like industry blogs, news sites, educational institutions, and authoritative industry-specific websites.

Competitor Analysis:

Analyze Competitors:

Use tools like Ahrefs, SEMrush, or Moz to analyze the backlink profiles of top competitors.

Identify the number and quality of backlinks that successful competitors have and use this as a benchmark.

Steady and Natural Growth:

Gradual Build-Up:

Avoid acquiring a large number of backlinks in a short period, as this can appear unnatural to search engines and might result in penalties.

Aim for a steady and natural growth in backlinks, which indicates organic popularity and relevance.

Metrics to Monitor:

Monitor Backlink Profile:

Regularly use tools like Google Search Console, Ahrefs, or Moz to monitor the backlink profile.

Disavow Low-Quality Links:

Identify and disavow any low-quality or spammy backlinks that could harm the website's SEO.

Continuous Effort:

Building backlinks is an ongoing process. Regularly producing valuable content and engaging in outreach should be part of Tushar's long-term SEO strategy.

By focusing on these guidelines, Tushar can develop a robust backlink strategy that enhances his website's authority and improves search engine rankings.

6. Where and how should he audit his website from technical perspective

To conduct a thorough technical SEO audit of his website, Tushar should use a combination of tools and manual checks. This will help identify and resolve any issues that might affect the site's performance, usability, and search engine rankings.

Tools for Technical SEO Audit

- Google Search Console
- Google Analytics
- Screaming Frog SEO Spider
- Ahrefs/Semrush/Moz
- GTmetrix/PageSpeed Insights
- Ahrefs Site Audit
- DeepCrawl

Steps for a Technical SEO Audit

1. Crawl the Website

- Use Screaming Frog SEO Spider:
- Check for Crawl Errors:

2. Check Indexation

- Google Search Console:
- Site: Command:

3. Analyze Site Speed and Performance

- Page Speed Insights:
- GT metrix:

4. Mobile-Friendliness

- Mobile-Friendly Test:
- Responsive Design Check:

5. HTTPS Implementation

- SSL Certificate:
- Mixed Content Issues:

6. Site Architecture and URL Structure

- Logical Structure:
- Clean URLs:
- Internal Linking:

7. On-Page SEO Elements

- Meta Tags:
- Headings:
- Alt Text:

8. Canonicalization

- Canonical Tags:
- URL Consistency:

9. XML Sitemap and Robots.txt

- XML Sitemap:
- Robots.txt:

10. Schema Markup

- Structured Data Testing Tool
- Implement Schema:

11. Error Pages and Redirects

- 404 Pages:
- 301 Redirects:

12. Backlink Profile Analysis

Quality Backlinks:

Disavow Toxic Links:

Ongoing Monitoring:

Scheduled Audits:

By following this comprehensive approach, Tushar can identify and fix technical issues that might be hindering his website's performance, thereby improving its usability, search engine rankings, and overall effectiveness.

yoast SEO

The screenshot shows the Yoast SEO dashboard within a WordPress admin interface. The browser address bar indicates the URL: `janvi.vicharblogging.com/wp-admin/admin.php?page=wpseo_dashboard`. The top navigation bar includes the WordPress logo, site name "Janvi blog", a comment count of 0, a "New" button, a "WPForms" notification with 5 items, and a user profile "Howdy, admin".

The left sidebar contains a menu with the following items: Posts, Media, Pages, Comments, Feedback, Elementor, Templates, WPForms, Appearance, Plugins, Users, Tools, Settings, Ahrefs SEO, and Yoast SEO (highlighted in blue).

The main content area features two tabs: "Dashboard" (active) and "First-time configuration". Below the tabs, there are two status boxes:

- Problems (0)**: A green checkmark icon. Text: "Good job! We could detect no serious SEO problems."
- Notifications (0)**: A purple checkmark icon. Text: "No new notifications."

Below these boxes is a "Credits" section with a link: [See who contributed to Yoast SEO.](#)

At the bottom of the main content area, there is a white box titled "Upgrade to Yoast SEO Premium" with a purple question mark icon. It lists features: "+ AI: Better SEO titles and meta descriptions," and "+ Multiple keywords: Rank higher for more".

On the right side, there is a purple sidebar titled "Yoast recommendations for you". It features the Yoast logo and a large yellow button that says "Get Yoast SEO Premium ►". Below the button, it states: "Only \$/€/£99 per year (ex VAT)" and "30-day money back guarantee." At the bottom of this sidebar, it says "Read reviews from real users" and shows a rating of 4.6 / 5 with five stars.
